Cashlogy, IT'S ABOUT YOUR MONEY

The Cashlogy® POS1000US is built for retail:
Restaurants, QuickServe, Supermarkets, Bakeries, Specialty Retail, Gas and C-Stores.

Designed to offer unprecedented levels of performance

- **Attended:** The retail sales associate collects and inserts bills and coins into the Cashlogy® POS1000US and returns dispensed change to the customer
- **Self-service:** The customer deposits bills and coins directly into the Cashlogy® POS1000US, when prompted, and receives change directly without cashier intervention
- **Mixed / Split:** Coin and bill recyclers are divided where the customer deposits coins into the coin recycler and the retail sales associate collects and inserts the bills
- **Shared / Stand-Alone:** The Cashlogy® POS 1000US may be assigned to one or more clerks and shifts

Recyclers Side-By-Side:
Attended or self-service orientation
As shown: 22 ½ in W x 24 ¼ in D x 15 ¼ in

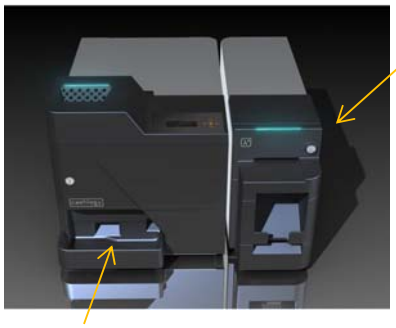

Split:
Modular integration

Cashlogy® POS1000US

DESIGNED FOR YOUR BUSINESS

From the leaders in cash payment processing, Cashlogy® POS1000US is the best choice to serve the cash recycling needs of the retail front end

Coin Recycler

- Fast!
  - Counting: 3.5 coins per second
  - Dispensing: 20 coins per second
- Convenient hopper accepts bulk and mixed coin loading
- Accepts and recycles the most common coin denominations:
  $0.01 $0.05
  $0.10 $0.25
  $1.00 (dollar coin)
- Coin validation relies on several layers of mechanical and digital technology
- Robust and reliable coin sorting technology

Bill Recycler

- Fast!
  - Counting: 1 bill per second
  - Dispensing: 1 bill per second
- Accepts each USD bill denominations, from $1 to $100
- Recycles three bill values to be used as change. $1, $5 and $10 (or other configurations up to 3 bill denominations)
- All other denominations deposited are immediately and securely stored in the internal stacker
- Bill storage capacities:
  - 41 to 43 bills in each of three bill recyclers
  - 500 bills in the single internal stacker
- Secure hoppers included to permit reliable machine unloading

Quality Assured

Accepts, validates, sorts, stores, and dispenses currency based on transaction data from the POS software

Real-time bill validation – 'bad' coins and bills are rejected

Counts Cash Fast

Coins and bills are processed simultaneously to assure fast transactions

Rapid coin counting and sorting

Coins accepted in bulk with mixed denominations

Secure transportation of bills

Detection of access door openings

Separate keys for each level of access: cashier, collector and technician

Locked bill stacker enables secure bill transport

Modular system with convenient access

Easy access to bill stacker and internal components

Designed for long life with intuitive and straight-forward maintenance and trouble-shooting.
