The Intermec® 6822 printer produces high-quality customer invoices, receipts, load reports, transfers and other documents for route accounting applications. The real time accounting structure provided by the 6822 printer and Intermec handheld computers facilitates route delivery settlement and ensures customer information is always current.

Customers have the choice of portable or fixed-mount configurations depending on mobility requirements.

Portable

The Intermec 6822 printer provides flexibility and mobility. It features a handle for easy carrying and a compact tray which

holds enough paper for an entire day. A seat-mount strap is available to secure the printer in vehicles with bench seats. An optional, soft-sided carrying case provides a sealed compartment inside the case cover for storage of invoices.

Fixed Mount

The fixed mount model is ideal for applications where mounting the printer in a vehicle is preferred. The mobile computer holder can be mounted either to the side of the printer or remote from the printer, whichever is most convenient. Although the printer is safely mounted to the vehicle, a quick release feature allows one-step removal of the printer for swapping from one vehicle to another.
