

DATACARD® SP25 PLUS CARD PRINTER

INNOVATIVE APPLICATIONS

Use the Datacard® SP25 Plus card printer to produce full-color photo IDs, monochrome cards, rewritable cards or cards that utilize a combination of all 3 technologies:

- Corporate visitor ID cards
- Employee ID cards
- Student IDs with rewritable class schedules
- Patient ID cards with rewritable appointments/schedules
- Transit cards with rewritable ticketing details or schedules
- Retail cards with rewritable loyalty points
- Ski lift tickets and other recreation cards

Affordable and flexible dual-function printing

The Datacard® SP25 Plus card printer offers both full-color/monochrome card printing and innovative rewritable card technology in a flexible, dual-function design. This unique, affordable printer is an ideal solution for low-volume applications or requirements.

- **Outstanding color and monochrome card printing.** The SP25 Plus card printer makes it easy to produce attractive cards with high-quality, full-color or single-color photos, graphics and text. Advanced Imaging Technology™ helps ensure bold, vivid color, precise bar code printing and sharp fine-line details.
- **Remarkable rewritable technology.** The SP25 Plus card printer delivers single-color photos and text on rewritable cards with excellent image quality. Rewritable cards feature a clear, heat-sensitive layer that can be erased and rewritten over 500 times. They offer an affordable way to update cards with frequently changing data or create reusable cards, such as temporary visitor IDs, because rewritable cards eliminate the supply costs of reissuance.
- **Simple operation and maintenance.** To help ensure exceptional ease of use, the SP25 Plus card printer features quick-change supplies and input hopper for batch issuance in a compact design. Everything you need to get started comes in a color supply kit, including a color ribbon, blank cards and cleaning supplies.
