GENERAL DESCRIPTION

SC6000 is a Datalogic industrial controller specifically designed for omnidirectional and multi-side reading tunnels. SC6000 is based on a robust alloy case divided into two sections: the upper section is composed of a display, keypad and LEDs. The lower section contains the mother board, removable Compact-Flash memory, field bus boards and connector panel. It offers all necessary tools enabling System Installation and Setup, Testing and Maintenance of an omnidirectional reading tunnel. The SC6000 key features are:

- Bus Controller: cluster management and Host interface of a multi-side reading tunnel based on a Lonworks bus.
- Simple and effective diagnostic indications based on a display and LEDs, enabling quick and easy maintenance.
- Remote visibility of all main reading station information thanks to built-in Ethernet, field bus Modem connectivity.
