■Manual Information & Usage Precautions

This user manual contains basic information for product usage as well as for emergency measures that may be required.

※ The following separate manuals provide more detailed content on various technological issues and areas.

1. Windows Driver Manual

This manual provides information on the installation instructions and main functions of the Windows Driver.

2. Label Printer Utility Manual

This manual provides information on the usage of software for function selection of this product, operating condition modification, etc.

3. Programming (SLCS) Manual

This manual provides information on label printer commands.

4. True Font Downloader Manual

This manual provides information on the usage of the font downloader that can download True Fonts and facilitate their usage as Device Fonts.

5. Ethernet interface Manual

This manual provides information on the configuration and usage of Ethernet interface.

6. Label design program Manual

This manual provides information on the usage of the Windows PC program that can make labels by adding text, graphics, or barcodes at desired positions.

■ Safety Precautions

In using the present appliance, please keep the following safety regulations in order to prevent any hazard or material damage.

WARNING

Violating following instructions can cause serious injury or death.

Do not plug several products in one multi-outlet.

- This can provoke over-heating and a fire.
- If the plug is wet or dirty, dry or wipe it before usage.
- If the plug does not fit perfectly with the outlet, do not plug in.
- Be sure to use only standardized multi-outlets.

PROHIBIT

You must use only the supplied adapter.

ONLY SUPPLIED ADAPTER

PROHIBIT

Do not pull the cable.

PROHIBIT

Keep the plastic bag out of children's reach.

PROHIBIT

Do not plug in or unplug with your hands wet.

PROHIBIT

Do not bend the cable by force or leave it under any heavy object.

PROHIBIT

CAUTION

Violating following instructions can cause slight wound or damage the appliance.

If you observe a strange smoke, odor or noise from the printer, unplug it before taking following measures.

- Switch off the printer and unplug the set from the mains.
- After the disappearance of the smoke, call your dealer to repair it.

TO UNPLUG

Keep the desiccant out of children's reach.

PROHIBIT

Install the printer on the stable surface.

PROHIBIT

Use only approved accessories and do not try to disassemble, repair or remodel it for yourself.

- Call your dealer when you need these services.
- Do not touch the blade of auto cutter.

**DISASSEMBLING
PROHIBITED**

Do not let water or other foreign objects in the printer.

- If this happened, switch off and unplug the printer before calling your dealer.

PROHIBIT

Do not use the printer when it is out of order. This can cause a fire or an electrocution.

- Switch off and unplug the printer before calling your dealer.

TO UNPLUG

1. Content Confirmation

The following items should all be contained in the printer package.
Contact the dealer from which the purchase was made if any item is damaged and/or missing.

Metapace L-42T

Power Cord

AC Adapter

CD

Manual

USB Cable

Label roll

Cleaning Pen

2. Product Part

3. Installation & Usage

3-1 Power Connection

Connect power to the printer as shown below.

- 1) Turn off the printer power switch.
- 2) Check to see that the AC adapter voltage matches that of the power source.
- 3) Connect the AC adapter jack to the printer power connector.
- 4) Connect the power cord to the AC adapter.
- 5) Connect the power cord to a power source/outlet.

3-2 Interface Cable Connection

3-2-1 Standard Model

Connect the interface cable as shown below.

This printer supports the following communications interface standards.

- RS-232C(Serial) Cable
- IEEE1284(Parallel) Cable
- USB B-Type Cable

1) Turn off the power switch.

2) Connect the communication cable to the printer communication port.

- Connect the RS-232C(Serial) Cable to the SERIAL port.
and tighten the screw on both sides.
- Connect the IEEE1284(Parallel) Cable to the PARALLEL port.
and fasten the clips on both sides.
- Connect USB B-Type cable to the USB port.

3-2-2 Ethernet Model(Metapace L-42T)

Connect the interface cable as shown below.

This printer supports the following communications interface standards.

- RS-232C(Serial) Cable
- LAN(Ethernet) Cable
- USB A-Type(WLAN Dongle)
- USB B-Type Cable

1) Turn off the power switch.

2) Connect the communication cable to the printer communication port to be used.

- Connect the RS-232C(Serial) Cable to the SERIAL port.
and tighten the screw on both sides.
- Connect the LAN(Ethernet) Cable to the ETHERNET port.
- Connect USB A-Type(WLAN Dongle) to the HOST port.
- Connect USB B-Type Cable to the USB port.

3-3 Paper Installation

1) Open the Paper Cover.

2) Spread the paper holder and insert paper as shown.

3) Open the Ribbon Assembly and spread the paper guide.

4) Feed the paper between the Paper Guide on both sides.

5) After Installation the paper, manually set the sensor(Gap & Black-Mark) and Paper Guide to the correct position.

6) Close the Ribbon Assembly until a click sound is heard, close the Paper Cover.

3-4 Ribbon Installation

3-4-1 Type of Ribbon

1) Type by Film Coating Location

- Take note before ribbon purchase that only ribbons facing outward can be used.

Outside Ribbon

Inside Ribbon

※ Note

- Follow the procedure described below to determine the coating surface of the ribbon.
 - Ribbon test using adhesive material
 - Perform contact test in order to determine which side is coated if there are useable labels.
 - Complete the following steps to carry out the contact test
 - Remove the liner from the label
 - Put a piece of adhesive surface of the label on the outer/inner surface of the ribbon, and apply pressure.
 - Remove the label from the ribbon
 - Check whether adhesive surface of the label is stained by black ink ribbon.
- 2) Type by Roll Core
- This printer can be used to one-inch or half-inch core ribbon.
 - For a 1-inch core, a roll core must be used.
 - The holder ribbon and roll core of the fully used ribbon must be reused.
Do not discard.

3-4-2 Inserting a One-Inch Core Ribbon

- 1) Insert the Holder ribbon into the core and ribbon. (keep note of ribbon printing direction)

- 2) Open the ribbon assembly and insert the ribbon and core by pushing from left to right.

- 3) Apply tape to the coiling portion of the ribbon.

- 4) Press the Close area to shut the ribbon assembly.

3-4-3 Inserting a Half-Inch Core Ribbon

- 1) Open the ribbon assembly and insert the ribbon and core by pushing from left to right. (keep note of ribbon printing direction)

- 2) Apply tape to the coiling portion of the ribbon.

3-4-4 Knob Adjustment by Ribbon Length

Ribbon lengths of 74m, 100m (0.5" core), and 300m (1" core) can all be used with this product. Adjust the knob accurately according to the ribbon length (74 ~ 300 m). Exercise care as print quality and operation can be affected.

- The product is shipped with a default setting for a ribbon length of 300m (1" core). To use a 74m (0.5" core) ribbon, adjust (rotate) the knob in the direction of 74m prior to use.
- When the cover is outside the knob as shown in the image, the ribbon length is set to 74m. If the cover is inside the knob as shown in Image B, the ribbon length is set to 300m.

Image-A (74m)

Image -B (300m)

■ Knob Adjustment

- Grasp the ribbon while it is fitted and rotate the knob as shown in the image.

Knob

Ribbon

3-4-5 Narrow Ribbon Installation

When using ribbons of widths of 110mm or lower, install in a centered position on the holder ribbon.

3-4-6 Ribbon Removal

- 1) Use a knife or other sharp-edged object to cut the ribbon.
(Take care not to injure hands)
- 2) Open the ribbon assembly and remove the ribbon and core by pushing from left to right.
- 3) Detach the ribbon holder from the ribbon and core.

3-4-7 Ribbon Sensor Activation

Ribbon detection sensor is disabled by default factory settings. Check the settings related to ribbon detection sensor if printing does not stop when the printer is out of ribbon or ribbon is broken.

* Ribbon detection sensor can be enabled by command control. And default setting can be changed by Label Utility.

※ CAUTION

1. When replacing a ribbon, keep affixed the core of the fully used ribbon to the ribbon coiling portion on the other side and do not discard as its use is required.
2. As the ribbon holder is required for continuous use, make sure not to misplace it.

3-5 LED Display

3-5-1 Button Operations

Printer state before operation	Button		Operation procedure	Printer operation mode
	Feed/ Cancel	Pause		
Power OFF	Depress	-	• Apply power while depressing the button. • Hold the button for about five seconds.	Self-test Printing Mode.
Print Standby	Depress	-	• Depress the button softly and release it immediately	Feed Mode
Print Standby	-	Depress	• Depress the button for two seconds and continue to hold	Stand-alone configuration Mode
During printing	Depress	-	• Depress the button softly and release it immediately	Print Cancel Mode
During printing	-	Depress	• Depress the button softly and release it immediately	Print Pause Mode

3-5-2 LED indicator for various printer statuses

LED 1		LED 2		Printer Status	
Color	Status	Color	Status		
Green	On	Green	On	Print standby mode	Print standby mode
Red	On	Red	On	Error mode	Ribbon is not detected
Red	On	Orange	On	Error mode	Paper jam (gap/black mark is not recognized)
Red	On	Green	Blink	Error mode	Printer head overheating
Red	On	Red	Blink	Error mode	Cover open
Red	On	Orange	Blink	Error mode	No paper
Red	On	-	Off	Error mode	Media calibration failure
Red	Blink	Red	Blink	Error mode	Auto-Cutter error
Orange	On	Orange	On	Mode switching notification	Mode switching notification
Green	Blink	Red	On	Wait for input	Print is paused temporarily. Wait for button input
Green	Blink	Green	Blink	Wait for input	Cover Close Mode. Wait for button input
Green	On	Red	Blink	Wait for input	Print Cancel Mode. Wait for button input

3-6 Test printing

3-6-1 Printing using Windows driver

- 1) Install the Windows driver.
Refer to the “Windows driver manual” in the CD for the installation procedure.
- 2) Set the “port” of Windows driver to the appropriate interface to be used. Refer to the “Ethernet interface user’s manual” in the CD when using Ethernet interface.
- 3) Print the test page using the “Print test page” function of Windows driver.

3-6-2 Printing using label design program

- The label design program is included in the separate CD.

- 1) Install the label design program.
- 2) Refer to the “Label Design Program Manual” included in the CD and set the interface.
- 3) Print the test page after designing a label.

4. Self-Test

The self-test checks whether the printer has any problems.

- Firmware version, printer configuration information, printing quality checking pattern, and peripheral configuration information, etc.

Users cannot perform this procedure if using the printer's label peel-off option. If the printer does not function properly, contact an authorized dealer.

How to start the self-test:

- 1) Make sure that the paper roll has been installed properly.
- 2) Turn on the power while holding down the FEED button. The self-test begins.

5. Detailed features

5-1 Printer setting using utility program

Various printer settings can be changed using the utility program (Label Utility).

Functions that can be used with the utility program are as follows.

- 1) Serial communication settings
Handshake, Stop bit, Data bit, Parity, and Baud rate can be configured.
- 2) Basic printer settings
Paper size, printing speed and density, paper type, and use of ribbon can be configured.
- 3) Language setting
Code page can be configured.
- 4) Media sensor manual calibration function
This function can be used to detect special type or special material paper that is not detected through automatic calibration function. Refer to M Manual Calibration page for more details
- 5) Other functions for printer test are also provided.

Refer to the Label Printer Manual contained in the CD for more detailed information.

5-2 Stand-alone Configuration Mode

Various modes can be executed using buttons and LED only.

5-2-1 How to start stand-alone configuration mode

- The printer mode is set to Printer Setting Mode when the Pause button is depressed for two seconds while in Print Standby Mode.
- Both LEDs will change to orange color and the printer will be set to Stand-alone Configuration Mode.
- When the printer enters into this mode, the status of LED 1 and LED 2 are changed sequentially.
- When the Feed button is depressed at specific LED color combination, the corresponding printer operation will be selected.

5-2-2 List of supported functions

Sequence number	LED 1		LED 2		Printer operation
	Color	Status	Color	Status	
1	Green	On	Green	Blink four times	Print Configuration Info.
2			Orange	Blink four times	Print File List
3			Red	Blink four times	Factory Reset
4	Orange	On	Green	Blink four times	Gap Sensor Auto Calibration
5			Orange	Blink four times	B/M Sensor Auto Calibration
6			Red	Blink four times	Data Dump Mode
7	Red	On	Green	Blink four times	-
8			Orange	Blink four times	-
9			Red	Blink four times	-

5-3 Pause/Cancel

During multiple-page print jobs, the Pause and Cancel button can be used to temporarily cease printing and cancel the print job altogether, respectively.

5-3-1 Pause/Resume Function

- 1) When printing labels, pressing the Pause button
- 2) The printer will pause after finishing the current label printing and the status of LED will be as follows.
 - LED 1: Green Blink
 - LED 2: Red On
- 3) While the print job is paused, press the Pause button again to resume printing.

5-3-2 Print Cancellation

- 1) During label printing and/or pause mode, pressing the Cancel button enters the print cancellation mode.
- 2) The following processes occur in the print cancellation mode.
 - All label printing cancelled
 - All data received in the printer communications buffer deleted.
 - All received data deleted.
- 3) The LED Status in the print cancellation mode can be as follows.
 - LED 1: Green On
 - LED 2: Red Blinking
- 4) While in the print cancellation mode, press the Cancel button again to return to print standby mode.

5-4 Media Calibration

This printer has been designed to recognize the gaps with most print papers, but sometimes it may not recognize the gap and keep feeding paper if a special type of paper is used. In this case, run Auto Calibration function so that the printer can recognize the gap. Metapace printer provides various media calibration methods in order to accommodate various special paper types.

5-4-1 About media calibration

- This function is for adjusting the sensitivity of the paper detection sensor for accurate printing position control and measuring actual length of paper.
- Sensor sensitivity adjustment
 - The purpose is to detect the identifier (gap/black mark/groove) of installed label printer
- Paper length measurement
 - Accurate length is required to rotate the printing orientation.
 - The purpose is to detect the change of paper type.

5-4-2 When is media calibration required?

- When the printer is installed first time
- When the newly installed paper is a different paper type
- When printer position is not accurate or printer does not stop in the right position

5-4-3 How to perform media calibration

- The following four methods of media calibration can be used depending on the conditions.
 - Smart Media Detection
 - Gap Sensor Auto Calibration Mode
 - Black Mark Sensor Auto Calibration Mode
 - Manual Calibration Mode
- Why are several calibration methods provided?
 - Multiple labels should be scanned for media calibration and more accurate sensitivity calibration can be performed when more labels are scanned.
 - The number of labels to scan for sensor sensitivity adjustment depends on various conditions such as label paper material, color, surface status, thickness, gap length, pre-printed pattern, etc.
 - Four different media calibration modes are provided for compromise between prevention of excessive use of paper and accuracy of sensor sensitivity adjustment.
 - Smart media detection mode that allows for adjustment of sensitivity with minimum amount of scanning should be good enough for most cases with general labels.
 - Try various methods in order of Smart Media Detection → Gap Sensor Automatic Calibration → Black Mark Sensor Automatic Calibration → Manual Calibration Mode.

5-5 Smart Media Detection

- Printer executes this function when necessary without user input and media configuration can be completed with Smart Media Detection function for most print papers.
- Papers with gap and black mark can be identified without separate settings.
- 3 ~ 5 pages of labels will be used depending on the type of paper.
- Smart Media Detection function is executed in the followings cases
 - When the printer is installed first time, it is executed through Feed button or print command.
 - When change paper length is detected during feeding or printing.
 - When the paper type entered by command is different from the configured paper type.
 - After reset with factory settings
- Smart Media Detection function will be turned off after setting the sensor sensitivity using Automatic Calibration Mode or Manual Media Calibration mode, and it will be enabled again after resetting the printer with factory settings.

5-6 Gap Sensor Auto Calibration Mode

Use this mode when paper is not detected correctly with Smart Media Detection function.

Printer feeds paper and calibrates Gap Sensor automatically.

The printer will enter error mode if paper detection fails after feeding up to 1 meter of paper. Error mode can be released by opening and closing the cover.

Use Manual Calibration Mode if paper detection fails in this mode.

Smart Media Detection will be disabled if paper detection is successful in this mode.

5-6-1 Procedure to run the calibration

- Depress the Feed button at 4th LED sequence in 5-2-2 (LED 1 Orange / LED 2 Green – Blink four times) to start Gap Sensor Automatic Calibration Mode.

5-7 Black Mark Sensor Auto Calibration Mode

Use this mode when paper is not detected correctly with Smart Media Detection function.

Printer feeds paper and calibrates Black Mark Sensor automatically.

The printer will enter error mode if paper detection fails after feeding up to 1 meter of paper. Error mode can be released by opening and closing the cover.

Use Manual Calibration Mode if paper detection fails in this mode.

Smart Media Detection will be disabled if paper detection is successful in this mode.

5-7-1 Procedure to run calibration

- Depress the Feed button at 5th LED sequence in 5-2-2 (LED 1 Orange / LED 2 Orange – Blink four times) to start Black Mark Sensor Automatic Calibration Mode.

5-8 Manual Calibration Mode

Manual-calibration of media detection can be used when the printer cannot detect a media gap (or black mark) even after auto-calibration has been executed.

Users can calibrate sensor parameters in detail by using the utility program provided by the manufacturer.

The utility can be obtained from the enclosed CD or downloaded from the Internet via the Metapace website www.metapace.com

Please make sure the printer is connected and execute the utility program.
Please the Calibration Setting Manager Button after setting the interface type.

- 1) Select the sensing type and input the label length by millimeter and click on “Check Sensing Value” tap. Then printer starts to calibrate.
- 2) The scanned values will appear on the Utility.
- 3) Optimal sensing values will appear in black bold letters on the left of the utility screen and select one of the values and click on “Save Calibration”
- 4) If chosen value does not work properly, please try the other values among the black bold letters.
- 5) To go back to the initial value, please click on “Cancel Calibration”

5-9 Cover Closing Mode

1. About Cover Closing Mode

- The printed area may become out of range of paper if the paper is not in the accurate printing position when the cover is opened and closed.
- The printer is put to Cover Closing Mode instead of Print Standby Mode when the cover is closed in order to prevent this problem, and it waits for user input.
- The status of LEDS are as follows in this mode.
 - LED 1: Green Blink
 - LED 2: Green Blink
- The data received during Cover Close Mode are not printed, and they are printed automatically when the printer recovers to the Print Standby Mode.

2. How to switch the printer from Cover Close Mode to Print Standby Mode

- Depress the Pause button to switch to Print Standby Mode without feeding any paper.
- Depress the Feed button to feed one page to align the paper position and switch to the Print Standby Mode.

5-10 Data Dump Mode

This function can be used to diagnose the communication issues when the printing does not work correctly.

In this mode, the received data are not analyzed and printed, instead they are dumped in hex format without processing.

Turn the printer off and on to recover to the Print Standby Mode.

5-10-1 How to start Data Dump Mode

- 1) Depress the Pause button for two seconds during Print Standby Mode.
- 2) Both LEDs will change to orange color and the printer will be set to Stand-alone Configuration Mode.
- 3) Depress the Feed button at the third LED sequence in 5-2-2 (LED 1 Green / LED 2 Red – 4 times Blink) to enable Data Dump Mode.

5-11 Factory Reset

This function is used to reset the printer settings to factory default settings.

5-11-1 How to reset the printer

- 1) Depress the Pause button for two seconds during Print Standby Mode.
- 2) Both LEDs will change to orange color and the printer will be set to Stand-alone Configuration Mode.
- 3) Depress the Feed button at the second LED sequence in 5-2-2 (LED 1 Green / LED 2 Orange – 4 times Blink) to reset the printer to factory settings, and Smart Media Detection function will be executed.

5-13 The Peel-Off

As a function that is used to peel-off labels, it is used only with label paper.
(After adjusting the peeler switch, power must be turned off and on in order for the operation to be acknowledged.)

- 1) Open the paper cover.
- 2) Open the Ribbon Assembly.
- 3) Open the label peel-off cover and set the peeler switch to the ON position.
 - Check to see that the LED has turned on.

- 4) Remove one sheet of the label paper, and insert the paper as shown in the image below.
 - Prior to removing a label, the peeler switch must be set to the ON position.

5) Adjust the paper guides and close the label peel-off cover.

6) Close the Ribbon Assembly until a click sound is heard, close the Paper Cover.

7) Turn the printer off and on.

5-14 Using Fan-Fold Paper

Supplying paper to the printer externally is done as follows.

5-14-1 Printer Preparation

Remove the rear paper supply cover on the back side of the printer with a knife or other cutting instrument.

※ CAUTION

- Take care not to injure the hands and/or any other part of the body when performing this step.

5-14-2 When Using Pan-Fold Paper

- 1) Insert the paper at the rear of the printer using the slot and guides.

- 2) Adjust the holder and guides to the width of the paper.

5-14-3 When using large-capacity paper roll (option)

※ install the paper in the same way as pan-fold paper.

5-15 Auto Cutter (Metapace L-42T)

For auto paper cutting, products equipped with auto cutter are available.

In factory setting, the auto cutter is attached.

Auto-Cutter can be controlled by command. And default setting can be changed by Label Utility.

※ The paper installation method is the same as paper with no auto cutter.

6. Cleaning Head

Printing quality might be degraded by dust, foreign substance, adhesive substance, or other pollution materials stuck in the printer head or inside the printer.

When dirty, clean the print head as follows:

※ CAUTION

- Make sure to turn the printer power off prior to cleaning.
- As the print head gets very hot during printing, if intending to clean the print head, turn the printer power off and wait approximately 2~3 minute before commencement.
- When cleaning the print head, take care not to touch the heated portion of the print head.
 - Printer Head is susceptible to damage from static electricity, etc.
- Take care not to allow the print head to become scratched and/or damaged in any way.

6-1 Cleaning Head

- 1) Open the paper cover and Ribbon Assembly and then use the cleaning pen to clean the head in the direction from the center of the head to the edges.
- 2) After cleaning the head, do not use the printer until the alcohol used for cleaning evaporates completely (1~2 min) and the printer has completely dried.

- ※ Perform the cleaning process each time the paper roll is replaced to prevent print quality deterioration.

6-2 Cleaning Sensors, Roller or/and Paper Path

- 1) Open the paper cover and ribbon assembly, and remove the paper and ribbon.
- 2) Remove any dust or foreign substance using dry cloth or cotton swab.
- 3) Soak the cloth or cotton swab in alcohol for medical use and use it to remove adhesive foreign substances or other pollution materials.
- 4) After cleaning the parts, do not use the printer until the alcohol evaporates completely (1~2 min) and the printer has completely dried

※ Clean the parts when there is a degradation of performance in printing quality or paper detection.

7. Appendix

7-1 Specifications

Item		Description
Printer	Printing Method	Thermal Transfer / Direct Thermal Printing
	Dot Density	203 dpi (8 dot/mm) or 300 dpi (11.8 dot/mm)
	Printing Width	203 dpi: Max. 108 mm 300 dpi: Max. 105.7 mm
	Printing Speed	203 dpi: Max. 178 mm/sec (Max. 7ips) 300 dpi: Max. 127 mm/sec (Max. 5ips)
Paper	Width	25 ~ 116 mm
	Roll	Max 130mm
	Core	25.4~38.1mm (1~1.5")
Ribbon	Length / Width	Max 300m / 33 ~ 110mm(1.3~4.3")
	Type(Outside)	Wax, Wax/Resin, Resin
	Core	0.5" / 1"
AC Adapter	Input Voltage	AC 100~240V
	Frequency	50/60 Hz
	Output Voltage	DC 24V
Usage Conditions	Temperature	5 ~ 40 °C (Operating) -20 ~ 60 °C (Storage)
	Humidity (except for paper)	10 ~ 80 % RH (Operating) 10 ~ 90 % RH (Storage)

※ Note

- Printing speed can vary depending on the data transmission speed and combination of control commands.
- This equipment is indoor use and all the communication wiring are limited to inside of the building.
- The switch is the disconnecting device. Turn off switch from any hazard.

7-2 Label Types

- PET
